Burlington Environmental, Inc.
Technical Center
955 Powell Avenue SW
Renton, WA 98055

Dear Mr. Stiller

Re: Requested Modification to the Burlington Environmental Inc. (dba Philip Environmental)
Pier-91 Facility's Dangerous Waste Permit; WAD000812917.

This correspondence serves as official approval by the Washington State Department of Ecology (Ecology), for the proposed Class 2 Modification to the final facility closure plan for the Pier-91 facility permit in your submittal of August 19, 1996. The specific modification request approved is designated by Burlington Environmental Inc. (Burlington) as number PRMOD8-2. This modification to the operational permit, updates the facility's closure plan to meet the requirements of the Washington State Dangerous Waste regulations.

Pursuant to Permit condition I.C., the procedures to be followed for permit modifications at the request of the Permittee are defined by WAC 173-303-830(4). The proposed modification is specifically classified in Appendix I of WAC 173-303-830(4) and is required under amendments to an approved closure plan under WAC 173-303-610(3). Burlington has met the requirements under the regulations and no comments were received during the Public Notice comment period which ended October 22, 1996. Consequently, Burlington may now implement the approved final status closure plan as required under the Class 2 modification.

If you have any questions or comments regarding this matter, please contact Galen Tritt at the Department of Ecology (649-7280).

Sincerely,

Julie Sellick, Supervisor
Hazardous Waste and Toxics Reduction Section
